

Orchestrating a brighter world

NEC

The most accurate and fastest face recognition platform available

NeoFace® Watch

Public Transportation
High Performance Face Recognition

Why NeoFace Watch?

High Performance

In regular tests by the United States' NIST laboratories, NeoFace Watch has an error rate of less than half of the nearest competitor and handles 3.02 million searches per second, significantly faster than the nearest competitor.

Easy to Implement

NeoFace Watch uses common off-the-shelf hardware, including IP cameras, networks, servers and, where possible, existing infrastructure. Smart device applications are also available on iOS and Android platforms.

Easy to Integrate

Using robust RESTful APIs, solution providers can easily integrate NeoFace Watch with other systems that manage videos, customer relationships and security, offering an added dimension in facial recognition competency.

Flexible

Easy-to-use system configuration tools and monitoring utilities enable customers to tailor NeoFace Watch to specific operational requirements and ensure continued optimal operation.

Scalable

NeoFace Watch caters to a wide range of configurations to suit local deployment conditions and requirements, with a centralized or distributed architecture supporting multiple sites. It is designed to handle hundreds of millions of faces, thousands of cameras, and thousands of simultaneous user interface sessions.

From airports to stadiums, mass transit and on city streets, NEC's NeoFace Watch platform is ideally suited to preserve security anywhere people congregate – protecting the public, enhancing experiences and improving society.

NeoFace Watch Features

NeoFace Watch can perform **REAL TIME MONITORING** against thousands of surveillance cameras for individuals that pose a security threat and VIPs, automating alerts to security staff and reducing friction in frequent traveller programs.

NeoFace Watch **MATCH REPORTS** add value to access control solutions enabling the comparison of access logs against logs of actual passers-by, identifying “tail-gaiters” and staff who don't comply with access control policies and security protocol.

NeoFace Watch's forensic **FACE SEARCH** feature uncovers the identities of individuals seen in poor quality images and video surveillance, enabling loss prevention and corporate security to identify persons seen committing theft and mischief in recorded video.

NeoFace Watch **VIDEO ANALYSIS** processes large volumes of recorded video at better than real-time speeds, enabling post-event analysis of faces for loss prevention analysis.

NeoFace Watch **FLOW ANALYSIS** automatically enrolls and anonymously tracks individuals providing actionable information about service levels, and the efficiency of operations in aggregate.

A rich **RESTful API** enables enterprise to build integrated solutions upon the NeoFace Watch platform, providing highly accurate, scalable, and resilient face recognition functions for loss prevention and customer experience enhancing programs.

A Face Recognition Platform for Public Transportation

NeoFace Watch is a high-performance face recognition platform for real-time facial recognition against surveillance video and forensic searching of archived video and static images. NeoFace Watch helps secure transportation hubs, buses and trains by checking individuals appearing in surveillance video against watch lists and producing real-time alerts to security staff.

NeoFace Watch's scalable architecture and enterprise class features provide opportunities to monitor queue times for travellers negotiating security screening, the ability to speed trusted traveller authentication, provide access to enhanced services and to recognize and investigate known and suspected threats.

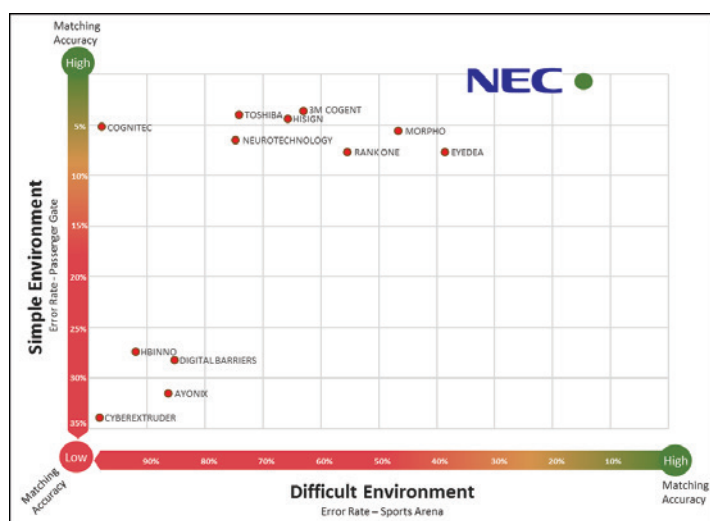

Enhance Security, Operations and Investigations

- Monitor for persons of concern and automate alerts to security staff.
- Create searchable face archives for physical access control audits and investigation.
- Document security contacts for liability, investigations and reporting.
- Speed investigations and close more cases using surveillance images and video.
- Process video from multiple sources including body worn and in-vehicle cameras, task specific and permanently deployed surveillance cameras, and citizen sourced evidence.

World's Most Accurate Face Recognition Solution

NEC is 2.5 times more accurate than the number two ranked participant for challenging scenarios involving crowded places.

NIST Face In Video Evaluation (FIVE) | March 2017

Graph produced from data published in NIST Interagency Report 8173. Results of the test are not intended to imply recommendation or endorsement of particular products by the U.S. government.

As independently evaluated by NIST in its most recent Face In Video Evaluation (FIVE) of Non-Cooperative Subjects, NEC's NeoFace face recognition technology has demonstrated its ability to perform face recognition under the most demanding real-world circumstances at the highest level of accuracy.

In earlier published reports, MBE (2010, 2011), FRVT (2013), NEC was also evaluated as the leading technology for accuracy, speed, resilience to viewing angles and other environmental variables.

As an Information and Communications Technology (ICT) leader with more than 117 years of expertise, NEC combines its advanced technologies, services and knowledge to help ensure the safety, security, efficiency and equality of society – enabling people to live brighter, more enriched lives.

About NEC Corporation

NEC Corporation is a leader in the integration of IT and network technologies that benefit businesses and people around the world. By providing a combination of products and solutions that cross utilize the company's experience and global resources, NEC's advanced technologies meet the complex and ever-changing needs of its customers. NEC brings more than 100 years of expertise in technological innovation to empower people, businesses and society.

The NEC Group globally provides "Solutions for Society" that promote the safety, security, efficiency and equality of society. NEC's brand message of "Orchestrating a brighter world" represents the fusion of advanced information and communication technologies and know-how created in coordination with partners and customers all over the world in order to contribute to the betterment of society and realise a brighter and more prosperous future.

About NEC in Public Safety

NEC has a proven track record in public safety and continually aims to bring its best-of-breed cutting-edge security technologies and total solutions to help public and private institutions safeguard lives and property in both the real and virtual worlds.

With a strong global footprint, NEC can leverage across regions to keep cities safer.

"Safer Cities" is an integral part of NEC's vision for Smart Cities, where people are able to live, work, and play in safety and comfort while also coexisting in harmony with the environment. NEC offers advanced technologies and solutions to make this a reality.

NEC has developed biometric technologies for more than 30 years and has solutions used by more than 1000 customers in over 50 countries worldwide. NEC's fingerprint and face recognition solutions are recognised in independent tests as the world's fastest and most accurate biometric technologies for identification.

About NEC Corporation of America: Headquartered in Irving, Texas, NEC Corporation of America is a leading technology integrator providing solutions that improve the way people work and communicate. NEC delivers integrated Solutions for Society that are aligned with our customers' priorities to create new value for people, businesses and society, with a special focus on safety, security and efficiency. We deliver one of the industry's strongest and most innovative portfolios of communications, analytics, security, biometrics and technology solutions that unleash customers' productivity potential. Through these solutions, NEC combines its best-in-class solutions and technology, and leverages a robust partner ecosystem to solve today's most complex business problems. NEC Corporation of America is a wholly-owned subsidiary of NEC Corporation, a global technology leader with a presence in 160 countries and \$28 billion in revenues.
