Intelligent Surveillance Solutions

Master Licence No:410271268
abtsecuritysystems.com.au

Core Benefits

- REDUCED CORPORATE RISK
- IMPROVED PUBLIC SAFETY
- ENHANCED MEMBER EXPERIENCE
- DRIVE INCREASED REVENUE/REDUCE COSTS

ABT Security Systems implement the world's leading Facial Recognition security systems . Features include real-time video surveillance and alerting, off-line video face search and high volume photo face search. It can be easily integrated with your existing security systems.

On-Premise Facial Recognition

- Suitable for data-sensitive businesses which need to run Facial Recognition while remaining fully compliant with privacy laws and regulations.
- 100% control of your data privacy and security by running on your local servers. On-Premise solution is the ultimate in privacy solution by keeping critical data in-house.
- Integrate with your current CCTV/VMS/Smartgate System to speed up your FR process and reduce cost.
- Highly flexible, with easy options to upgrade, control concurrency, monitoring usage, traffic and performance optimization.

Feature and Benefits

- Stop shoplifting before it happens, not after
- Fast and easy to deploy across multiple stores, cities or even countries
- Real-time video surveillance against watch lists
- Generates immediate alerts to address security threats
- Flexible licensing model
- Highly resilient to varying environmental conditions
- Unobtrusive and requires no operator interaction
- Highly scalable and extendable
- Easy integration with existing business processes

Pro-active loss prevention, enhanced customer loyalty and deep analytics on your retail business using highly accurate facial recognition technology.

40% of identified shoplifters return within 30 days, and 20% of those return more than four times in 30 days.

The next generation of retailers need the next generation of technology to enable immediate actionable responses to shoplifters, enhance their customers experience with personalised service and analyses their business with deep data on their trading activities.

ABT Security Systems implement the fastest and most accurate facial recognition software in the market. Features include real-time video surveillance and alerts, off-line video face search and high volume photo face search. It can be easily integrated with your existing security systems.

More than a security system, ABT Facial Recognition tracks subjects' behaviour through the monitored area.

It tracks subjects' behaviour and identifies:

- ❌ Barred, blacklisted and repeat offender shoplifters on "previously encountered" watchlists.
- ❌ Suspicious, undesirable and/or litigious individuals matched from archived live video footage.
- ❌ Movements of everyone (incl. Staff) to ensure low wait time, no one is loitering / in an area that they are not authorised to be in.

- ✅ VIP and High Value Loyalty Customer recognition and acknowledgment.
- ✅ Corporate Directors and Company Staff identified.
- ✅ The typology of your clients through collection of demographic data to establish the profiles of habitual clients.
- ✅ Enhanced footfall analytics.
