

Facial Recognition for Casinos

Intelligent Surveillance Solutions

Master Licence No:410271268
abtsecuritysystems.com.au

Core Benefits

- REDUCED CORPORATE RISK
- IMPROVED PUBLIC SAFETY
- ENHANCED PATRON EXPERIENCE
- DRIVE INCREASED REVENUE/REDUCE COSTS

ABT Security Systems implement the world's leading Facial Recognition security systems . Features include real-time video surveillance and alerting, off-line video face search and high volume photo face search. It can be easily integrated with your existing security systems.

On-Premise Facial Recognition

- Suitable for data-sensitive businesses which need to run Facial Recognition while remaining fully compliant with privacy laws and regulations.
- 100% control of your data privacy and security by running on your local servers, On-Premise solution is the ultimate in privacy solution by keeping critical data in-house.
- Integrate with your current CCTV/VMS/Smartgate System to speed up your FR process and reduce cost.
- Highly flexible, with easy options to upgrade, control concurrency, monitoring usage, traffic and performance optimization.

Features and Benefits

- Real-time video surveillance against watch lists.
- Generates immediate alerts to address security threats.
- Flexible licensing model.
- Highly resilient to varying environmental conditions.
- Unobtrusive and requires no operator interaction.
- Highly scalable and extendable.
- Easy integration with existing business processes.
- Strong positive identification of partial faces(eg. face masks).

Generate real-time alerts using highly accurate facial recognition technology.

At busy times, when traffic flow is hectic, guest list management can be a major challenge for entertainment venues. Unlike ID scanners, Facial Recognition Security Systems are unobtrusive. They do not take any personal data and require no interaction with patrons, but generate instant alerts against watch lists to ensure the safety of the property and patrons.

ABT's Facial Recognition solutions are specifically designed to integrate with existing surveillance systems and match against 'watch list' of individuals. When the system identifies an individual of interest from the 'watch list', it raises an alert, so that appropriate actions can be taken rapidly.

It tracks subjects' behaviour and identifies:

- ✗ Self-excluded
- ✗ Criminal or Persons of Interest.
- ✗ Excluded, barred, suspended, suspicious, undesirable, banned persons as they enter the Venue, or monitored locations within the Venue.
- ✗ Inappropriate (eg. age).
- ✗ Members/Guests on a RSA list.

- ✓ High value Gaming Members.
- ✓ VIP Members.
- ✓ Guest demographics (age, gender, etc.).
- ✓ Directors and Staff.
- ✓ Contractors, Suppliers, Competitors.

Facial Recognition Solutions for

Retail

Casinos

Major Event Venues

Buildings

Clubs
